Profile

Aspiring Software Developer and Data Enthusiast with strong foundations in Java, Python, and Machine Learning. Experienced in building full-stack applications and data-driven systems, with a focus on scalable solutions, clean code practices, and real-world problem solving.

Education

Master of Computer Applications (MCA) IMS Engineering College, Ghaziabad	Aug 2024 – Present
Bachelor of Computer Applications (BCA) College of Commerce, Arts and Science, Patna	Nov 2021 – May 2024
Intermediate St. Ann's High School, Patna	July 2019 – Aug 2021
High School Arora International High School, Patna	July 2019

Experience

Python Developer Intern Codec Technologies Pvt. Ltd. (AICTE Approved)	Sep 2025 – Oct 2025
- Completed a 1-month internship focused on Python development and real-world problem solving. - Developed and tested Python programs, improving coding efficiency and logical thinking. - Gained hands-on experience in debugging, code optimization, and writing clean, maintainable code. - Worked on practical tasks simulating real-world software development workflows.	
Deloitte Technology Consulting Virtual Internship (Forage)	2024
- Completed consulting-based tasks involving technology problem-solving and solution design. - Gained exposure to industry-level IT workflows and best practices.	

Projects

Student Analytics System (Machine Learning Project)
- Developed a machine learning-based system to analyze student performance and predict academic outcomes. - Performed data preprocessing, feature selection, and model building using Python libraries. - Generated insights to identify performance trends and support data-driven decisions. - Integrated backend logic with a user-friendly interface for visualization. Tech Stack: Python, Pandas, NumPy, Scikit-learn, flask, HTML, CSS, JavaScript
Hotel Management System
- Developed a full-stack system to automate hotel room booking, customer management, and payments. - Implemented booking workflows, employee tracking, and database integration. - Improved operational efficiency through structured backend design. Tech Stack: Java (JSP, Servlets), JDBC, Oracle DB
Tara's Timebound Tasks (Django Web App)
- Built a task management system with real-time countdown timers for effective deadline tracking. - Designed responsive UI and implemented notifications to improve productivity. Tech Stack: Django, Python, HTML, CSS, JavaScript

Technical Skills

Programming: Java, Python, C, SQL

Machine Learning: Data Analysis, Model Building, Data Preprocessing

Web Technologies: HTML, CSS, JavaScript

Frameworks: Django, Flask, JSP, Servlets

Databases: MySQL, MongoDB, Oracle

Tools: Git, VS Code, IntelliJ IDEA, Render

Certifications

- Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp (99 Hours) – Udemy (2026)
- Web Development – Udemy (2024)
- Generative AI Fundamentals – LinkedIn Learning (2024)

Soft Skills

Problem Solving, Leadership, Communication, Time Management

Languages

English, Hindi

Interests

Photography, Bike Riding, Web Research, Technology Exploration
